PROFESSIONAL SUMMARY

Hi, I'm Shehzad Muhammad Ali, a Computer Science student at the Institute for Art and Culture, specializing in MERN stack development. I have extensive hands-on experience building scalable web applications using MongoDB, Express.js, React.js and Node.js.

TECHNICAL SKILLS

Version Control: Git, GitHub

Programming Languages: C++, Java, JavaScript

Frameworks: React.js, Express.js, TypeScript.js, Html5, Css3

Database: MongoDB, Firebase, MySql

PROJECTS EXPIRENE

MERN Cart

Developed full-stack e-commerce websites using the MERN stack, implementing responsive front-end interfaces with React and efficient back-end functionality with Node.js and Express. Integrated MongoDB for dynamic data storage, handling product listings, user authentication, and order management.

Focused on optimizing user experience, building secure payment systems, and ensuring scalability for high-traffic e-commerce platforms.

NFT Marketplace

Currently developing an NFT marketplace using the MERN stack, focusing on building a dynamic front-end with React for browsing and purchasing NFTs. Implementing a secure back-end with Node.js and Express to handle transactions, user authentication, and smart contract integration. Utilizing MongoDB to manage user data and NFT metadata, ensuring scalability and efficient data handling for a growing marketplace..

EDUCATION

GRADUATION

IAC UNIVERSITY LAHORE

Bachelor in Computer Science (2022 - 2026)
